Professional Summary

Practical and detail-oriented Network Technician with foundational Cisco networking skills and NVQ Level 4 training in Computer Network Technology. Currently pursuing CCNA certification and experience in designing and simulating LAN topologies, implementing VLANs and basic access control, and installing/configuring Windows and Linux server environments for small-office scenarios. Strong troubleshooting mindset, clear communicator, and committed to fast learning and operational excellence in network support roles.

Certifications

- CCNA (Cisco Certified Network Associate) — In progress
- NVQ Level 4 — Computer Network Technician
- Professional practice coursework in software development; ongoing self-study in networking and automation

Languages

- English
- Sinhala
- Tamil

Education

Computer Network Technician — NVTI Narahenpita (2025 Jan - 2025 Dec)

Currently pursuing NVQ Level 4 in Computer Network Technology (CISCO CCNAv7) with a focus on advanced networking concepts and practical implementation.

Advanced Level (A/L) — Olcott College, Galle (2022 Jan - 2024 Nov)

Completed Advanced Level (A/L) in Commerce Stream
Index No: 1847821

- Accounting – A
- Business Studies – B
- Information and Communication Technology (ICT) – A

Ordinary Level (O/L) — Sudharma College, Galle (2011 Jan - 2021 Jun)

Completed G.C.E. Ordinary Level (O/L) Examination
Index No: 11266848 | Grades: ICT – A, Business & Accounting Studies – B, Art – B, History – B, Mathematics – C, Science – C, Islam – C, Sinhala – C, English – S

Full Stack Developer Programme — University of Moratuwa

Experience

- Configured and simulated LAN topologies using Cisco Packet Tracer to validate switching and inter-VLAN communication.
- Implemented VLAN segmentation and basic ACLs to control traffic between segments.
- Installed and configured Windows Server and Linux OS for small office lab setups — performed user account creation, basic services setup, and network connectivity testing.
- Performed basic network troubleshooting steps (ping/traceroute, interface checks, configuration verification).
- Built and maintained a personal portfolio website demonstrating projects and configuration examples.

Technical Skills

- Networking: TCP/IP, LAN/WAN, subnetting, VLANs, access control lists (ACLs), DHCP
- Routing & Switching: Cisco Packet Tracer simulations, basic routing & switching concepts
- Systems: Windows Server installation/configuration, Linux administration (basic)
- Tools & Languages: Cisco Packet Tracer, Python, HTML, PHP, MS Office, Adobe Photoshop/Illustrator
- Practices: Network troubleshooting, documentation, hardware/software configuration, user support
